

### Overview:

In this project, students celebrated the splendor of all the colors in the rainbow by creating with color. They learned to identify color names, produced shades of color and illustrated their feelings with color. In their art pieces students demonstrated how color is a part of their everyday world by painting and drawing and singing.

### Covered Objectives:

- Identifying the names of each part of computer and their functions.
- Discussing the computer "Do" and "Don't" and following rules for using the computer.
- Learning how to turn on and off the computer and practice it many times.
- Identifying shades of color
- Opening kid Pix Deluxe 4 and sign into the program
