

TECHNO Animal

Primary

Project Overview:

In this project, students create a multimedia report about animal. Using various resources, they gather facts about the diet, habitat, appearance, young, and threats of their selected animal. Afterwards, these facts are organized onto slides. Animation and transitions are applied to the slideshow to create an interesting and informative presentation. Specifically students complete the following activities:

- **Session 1: Animal Facts**
Select an animal and research their diet, habitat, appearance, young, and threats.
- **Session 2: Paint your Animal**
Paint a picture of the animal in its habitat.
- **Session 3: Animal Habitat**
Create a slide that includes a map of where the animal lives and information about the habitat.
- **Session 4: Animal Appearance and Food**
Create slides that include a picture of the animal, a description of its appearance, and a list of the food it eats.
- **Session 5: Animal Young and Threats**
Create slides that include a picture of the baby, information about the young, and a solution to threats facing the animal.
- **Session 6: Animal Report**
Edit the presentation. Apply animation and transitions. Share the report with classmates.

 **Technical Skills:** multimedia, graphics, telecommunications.

 **Technology Integration:** language arts, science.

 **Software Applications:** Microsoft PowerPoint, Microsoft Internet Explorer.
