

TECHNO Biography

Intermediate

Project Overview:

In this project, students construct a "web-ography", which is an online biography about a significant person. To start, they research their topic using the Internet and other resources. Facts are organized under headings such as childhood, education, career, accomplishments, death, and interesting facts. Students use their research to create a website. The site contains a Home, Biography, Timeline, and Sources page. Upon completion the web-ography is uploaded to the Internet. Specifically they complete the following activities:

- **Session 1: Research a Topic**
Conduct research for the biography. Organize the facts under headings.
- **Session 2: Website Design**
Design the "look" of the website by selecting a color scheme, background, and navigation bar.
- **Session 3: Home and Biography Page**
Create the Home and Biography Page by linking text boxes together and arranging pictures.
- **Session 4: Timeline Page**
Construct a timeline of important events using AutoShapes.
- **Session 5: Source Page and Editing**
Create the Source Page by arranging references in a table. Edit the content and layout of the site.
- **Session 6: Upload the Website**
Register with a free WebHost. Upload the website to the World Wide Web.

- **Technical Skills:** desktop publishing, telecommunications, word processing.
- **Technology Integration:** language arts, social studies.
- **Software Applications:** Microsoft Publisher, Microsoft Internet Explorer, Microsoft Word.
