

## TECHNO Photoshop

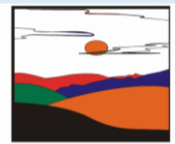

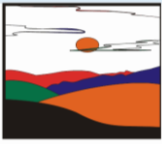

## Senior

### Project Overview:

In this project, students create a digital scrapbook. To start, students learn how to use a camera to take high-quality photographs. Once a library of images has been established, the program Photoshop is used to transform the picture into scrapbook pages. Ranging from whimsical to wacky, each page is a creative expression of the artist.

- **Session 1:** Students Learn about digital photography. They learn about the history of the camera and its connection to artists, they learn how to use it to take high-quality photographs. Students are then introduced to the idea of making a digital scrapbook. Afterward, students take a collection of photographs that they will use in upcoming sessions to make their own scrapbook.
- **Session 2:** students are introduced to Photoshop photo software. To start, they learn about the program environment. Afterward, they open a picture and experiment with the filters to change the overall appearance of the image. Each image is arranged using both the free transform and warp modes, to produce an interesting layout. Text is then added to describe the image.
- **Session 3:** Students are introduced to retouched tools that can be used to make an imperfect photo, Afterward; they apply this knowledge to one of their own pictures using at least two retouching techniques to make the photo look better. When this is complete, students create another scrapbook page. This time they learn how to add styles to each layer to create an eye-catching design.
- **Session 4:** Students learn how to use the adjustment command to recolor a photo of their choice. Although, these commands are commonly used to correct poor color quality in a picture, they can also be used to create fabulous artistic effects. Using the transformed photo, students make a third scrapbook page. This time, they learn how to use the brush tool to add flair.

- **Session 5:** Students combine picture to create an unbelievable scene that looks "real" to start; they follow the instructions to combine the door and tropic pictures to make it appear that a person is walking through a door into a tropical paradise. This activities has students experiment with various techniques to remove parts of the picture by using the magic wand tools, polygonal lasso, and magnetic lasso tool. Once familiar with each tool they apply their knowledge to create their own unbelievable scene. Using the transformed photo, Students make a fourth scrapbook page. This time, they learn how to use custom shapes to make the page look super.
- **Session 6:** Students apply their knowledge of Photoshop to create their own unique scrapbook page. They will use skills to create their final scrapbook page. Throughout this assignment are helpful tips and photo editing ideas.
- **Session 7:** Students transform their scrapbook pages into a web photo gallery, contact sheet, or PDF presentation. Their digital scrapbook can then be shared with family and friend.
- **Extra:** Students make brochures and business card.

- **Technology Integration:** Arts.
- **Software Applications:** Photoshop cs2, Internet Explorer
